

730 selected MAF records; 574 occupied cells (74 multi-type); 16 q-selected genes; supplied q < 0.05; 193 cohort IDs (Meta 49, Local 144).
Bars count distinct gene/sample/type presence, not raw events or TMB. memo_sort order; all selected records and actual IDs exported.
Blank = no supplied call, not verified wild type; multi-type cells partitioned. MutSigCV not rerun; cohort clinical meaning unverified.
